

OPSUN SELECTS CELESTICA TO PROVIDE PV PANELS IN ONTARIO

TORONTO, Ontario – July 7, 2011 – Opsun, a Canadian provider of innovative rooftop mounting solutions and PV modules, is proud to announce the signing of an agreement with Celestica, a global leader in the delivery of end-to-end product lifecycle solutions, to manufacture high-efficiency solar panels in Ontario, Canada.

The signing of this agreement completes Opsun's rooftop solar solution, comprised of patented mounting systems, top-tier Ontario-made PV panels and industry-leading support. "Opsun has been committed to developing and providing smart technology for our partners that maximizes ROI on every project," says Raymond Gilbert, Chairman of Opsun. "Choosing Celestica as the manufacturer allows us to integrate the high-efficiency solar panels in Ontario with Opsun's cutting-edge racking, thus ensuring maximum power output and structural integrity at a competitive cost."

The manufacturing and shipping of Opsun's panels is underway. The Ontario-made modules qualify for 15% domestic content under the province's Feed-In Tariff program. "Our main focus is the rooftop market," says Mr. Gilbert. "That is why we promote high-efficiency modules and provide expert support for our clients. Opsun's mounting solutions have been acclaimed as the smartest and most intuitive in the market. As we continue to innovate, our goal is to set a new standard in the solar industry."

About Opsun:

Founded in 2004, Opsun began as a high-tech research laboratory focusing on next-generation solar technology. Through the years, Opsun's scientists and engineers developed a wide range of technological solutions for solar installations.

We are proud of the quality of our integrated solar panels and mounting systems. Our end goal is to contribute to record-breaking project successes, every time. This is why we offer expert, in-depth support to our partners. Opsun makes the technology difference in solar projects for a maximum return-on-investment.
