

EnerWorks Signs Binding Purchase Agreement with Provision Solar (Proterra Solar)

For immediate release

May 6, 2011

Dorchester, ON . EnerWorks and Provision Solar today announced that they have signed a binding Purchase Agreement to sell EnerWorks to Provision Solar, based in Woodstock Ontario. Provision Solar operates under the name %Proterra Solar+and is part of a group of companies which includes Trigon, a construction management firm that has expertise in the solar field and Uvalux Tanning & Support which is a leader marketing and distribution. The sale is expected to close on or about May 18, 2011.

The business will continue to operate under the EnerWorks name, and all current EnerWorks products will continue in the market. In addition, the EnerWorks business will now offer Proterra Solar's high quality evacuated tube solar thermal products.

EnerWorks' operations have been relocated to Woodstock, Ontario and the new factory is already up and running. The mailing address for the EnerWorks is now: 969 Juliana Drive, Woodstock, Ontario N4V 1C1 Phone: (519) 268 6500

- Phone numbers, the website, and email addresses remain the same
- Suni Ball will take on the role of Managing Director
- Mike Noble (EnerWorks' founder) will remain with EnerWorks as VP of Business Development
- Derek Holman will become the new Director of Operations for EnerWorks
- Florin Plavosin, Andrew Mauchlen and others will remain as part of the team. Phil Whiting (ex-President & CEO of EnerWorks) will leave EnerWorks as an employee, but plans to join a new Board of Directors

EnerWorks' product offerings, pricing, and distribution partnerships are expected to remain in place - subject to future review and modification as per normal business practices.

About EnerWorks

EnerWorks Inc. is a leading North American solar thermal technology provider. With proven, patented technology and certified systems, EnerWorks offers high quality, reliable and cost effective renewable energy solutions to the North American and Caribbean markets.

EnerWorks develops and manufactures proprietary renewable energy appliances for residential, commercial and industrial markets. In the residential market, Networks' solar water heating appliances are fully certified, ENERGY STAR® qualified, and the first system to meet CSA international standards. They complement existing water-heating systems and provide users with clean energy and a real reduction in energy costs. In the commercial and industrial markets, EnerWorks is at the forefront of integrated solar thermal solutions, working with local partners to design, install, commission and maintain solar thermal heating and cooling systems.

About Proterra Solar Inc

Proterra Solar is a Canadian based provider of Evacuated Tube Solar Thermal Products, specializing in commercial and custom applications such as Oxford Gardens Solar Project, the largest evacuated tube

Solar Cooling project in North America. Powered with German made NARVA tubes, Proterra has one of the highest producing collectors in the market.
