

## **Carolyn Pittman - BIO**

With 15 years of experience in the renewable energy sector, Carolyn brings a proven track record of strong leadership in renewables. Working across various sectors, Carolyn has expertise in regulatory strategy, energy policy, project development, permitting/approvals, stakeholder engagement and environmental compliance. Her Government Relations role at Spark Power greatly contributes to the organization's unique position in the market as Spark Power aims to revolutionize the way electricity infrastructure services are delivered, with a focus on growing renewables.

Prior to her role at Spark Power, Carolyn was a key member of the development team at ENGIE, a large multi-national energy company. During her 10 years at ENGIE, Carolyn was an integral part of the team that developed, constructed and currently operates over 500MW of wind projects across Canada.

Carolyn is currently on the Board of Directors of the Canadian Solar Industries Association (CanSIA) and is focused on helping CanSIA to achieve their mandate of ensuring the continued success and growth of solar energy in Canada.
