PV INSTALLER

GERMAN SOLAR

German Solar is a renewable energy company focused on delivering innovative solar solutions to both commercial and residential customers. We build Photovoltaic systems using proven technologies that maximize solar power output.

Position Profile

A solar panel installer assembles solar photovoltaic (PV) systems on the rooftops or on the ground of both homes and businesses to convert the sun's power to electricity. The solar array installer position will require an individual that is comfortable working at heights and is competent in working on commercial buildings with a variety of flat and sloped rooftop configurations.

Responsibilities

- Installing racking, ballast and solar panels
- Assisting with setup and tear down of job site
- Maintaining a clean and safe work environment
- Other duties as assigned

Additional Attributes

- Must be comfortable working at heights. Ministry approved WAH certificate required
- Must have a Class G drivers license
- A fork lift license preferred
- Ability to take directions and follow instructions
- Ability and eagerness to learn quickly and adapt within a fast-paced environment
- Ability to work well independently
- Attention to detail
- Flexible work schedule
- Excellent work ethic and communication skills
- Well-organized and self-motivated.

Application Information

Interested candidates may forward their resume to ndelaurier@geainc.ca. Please indicate "PV Installer" in the email subject line.
