JOB POSTING #SOL225

POSITION: SENIOR PROJECT MANAGER – SOLAR ENERGY LONGUEUIL OR VANCOUVER (CANADA) OR SAN DIEGO, CALIFORNIA (UNITED STATES)

Do you want to be part of a growing company and working on building the future?

We are always looking for new talent, come join our team!

ROLE AND RESPONSIBILITIES

Reporting to the Director – Project Management, the Senior Project Manager – Solar Energy will have the following main responsibilities:

- In collaboration with the Director – Project Management, implement procurement and construction strategies for solar projects;
- Prepare budgets and optimize project capital expenditure (CAPEX) and operational expenditure (OPEX);
- Participate in project acquisition processes, including due diligence on technology, construction and operations strategy, scope and costs;
- Manage preliminary designs and studies required for the projects in collaboration with internal and external technical experts and the development team;
- Manage procurement strategies to ensure competitiveness in the request for proposals (RFP) processes and in the development of greenfield projects;
- Develop, review and manage construction and procurement RFP packages to be issued to suppliers and service providers;
- Review contracts and lead contract negotiation with suppliers and service providers;
- Establish and manage relationships with suppliers and service providers and ensure they provide committed deliverables on time, on budget, with the required quality;
- Support the Finance team by providing clear and concise input to financial models;
- Perform or support project risk assessment and propose and/or establish mitigation actions and plans;
- Ensure efficient transition between project development and project construction phases;
- Consolidate and organize cost breakdowns and provide cost estimates;
- Update project costs and information database;
- Improve and develop project management tools and processes;
- Ensure effective coordination and information sharing within the multi-disciplinary project team.

The masculine is used in this publication without prejudice for the sake of conciseness.

PROFILE

- Strong understanding of renewable energy project development;
- Strong organizational skills and attention to detail;
- Service-oriented with commitment to working within a multi-disciplinary team environment;
- Excellent interpersonal and communication skills;
- Ability to work both independently and as part of a team, self-starter and energetic;
- Available to travel mainly within the USA and Canada, approximately 30% of the time.

PROFESSIONAL REQUIREMENTS

- Mechanical, Civil or Electrical Engineering degree, or equivalent. A specialization or Master's degree in solar energy would be an asset;
- Minimum of 10 years of experience in the development, implementation and/or management of energy projects or in a similar position;
- Minimum of 5 years of experience in the construction of photovoltaic solar projects in the United States;
- Proficiency with the MS Office Suite, especially Project, Excel, Word and PowerPoint;
- Proficiency in English, both spoken and written; knowledge of French and/or Spanish, an asset.

COMPANY PROFILE

Innergex Renewable Energy Inc. is a global player with an extensive and growing portfolio of assets in Canada, the United States, France and Chile. The Corporation develops, acquires, owns and operates hydroelectric facilities, wind farms and solar parks exclusively producing renewable energy.

Sustainable development producing positive social, environmental and economic results guides our actions. We are not only proud of the work we do, but also of the way we do it. Our many accomplishments and continued successes are made possible by our outstanding team of employees.

Innergex, a publicly traded corporation, has offices in Longueuil, Vancouver, Lyon and San Diego.

The position could be based at the company's head office in Longueuil, Québec, at the Vancouver (BC) office or at the San Diego (California) office.
