

Ryan Tourigny, P.Eng. MBA

Director Business Development, Western Canada, Energy Group
Canadian Solar Inc.

Since 2003, Ryan has been active in the planning, design, financing and construction of energy and real estate projects. Ryan is Director, Business Development for Canadian Solar (NASDAQ: CSIQ). Previously, Ryan held various roles at Enbridge, Greengate Power Corporation, GenAlta Power, and ENMAX. Ryan's power generation development experience covers the full range of renewable and conventional generation technologies, including solar, wind, hydro, natural gas simple cycle, combined cycle, and co-generation projects.

Ryan served as Director, Project Development for Greengate Power Corporation where his work led to the development and deployment of wind power assets in Alberta worth approximately \$1 billion. At Enbridge Ryan participated in the development and acquisition of electricity power facilities throughout North America. While at ENMAX, Ryan participated in a broad range of engineering, project management, energy product development and energy marketing activities. Ryan's project development work with ENMAX included participating in the development and implementation of large-scale wind power facilities, run-of-river hydroelectric facilities and waste heat recovery generation projects in Alberta and British Columbia. Ryan also participated in the development, design, implementation and energy marketing activities for the Calgary Downtown District Energy (DE) Project, centered on 4th Street SE in Calgary.

Ryan holds a bachelor of engineering degree in electrical engineering with distinction and a Master of Business Administration degree, and he is a registered professional engineer in Alberta. Since 2008, Ryan has been active in supporting and investing in Canadian start-ups.
