MOOSE JAW'S 1st & LARGEST COMMERCIAL PV SOLAR ARRAY POWERING UP.

KRONAU, SK - FEBRUARY 22ND, 2016

In Moose Jaw, Saskatchewan, WINMAR® has become the talk of the town during the construction of the largest PV Solar Array on the roof of the facility. Under the SaskPower net-metering program, the 37 kW PV solar project will be commissioned and operational this week.

The largest commercial PV solar rooftop is fully monitored online, 24 hours a day and is expected to record approximately 45,000 kWh, supplying all of the building's total power needs each year. Additionally, the solar array will deliver clean energy to a high-powered level 2 electric vehicle charging station, expanding on corporate green transportation infrastructure.

An open house is scheduled February 29th, 2016. 1:00pm -3:00pm at 6 McKenzie Lane Moose Jaw, Saskatchewan.

The environmental impact of the solar array alone includes approximately 40 tonnes CO₂ offset and planting an estimated 40 trees annually.
