

UBIQUITY SOLAR LAUNCHES SARNIA PILOT PLANT

Sarnia, Ontario, Canada, September 24th, 2015 – Ubiquity Solar Inc. announced today the launch of its advanced silicon materials pilot plant to validate its process to improve the performance and cost effectiveness of silicon photovoltaic (PV) cells using the proprietary SolarBrick™ technology.

Ian MacLellan, President & CEO Ubiquity Solar said, “We are very pleased to launch the next step in the commercialization of our technology. Canada has the resources and skills to lead the way in creating technologies to manufacture the products that will grow this industry, lower harmful emissions and provide clean electricity all over the world.”

Ubiquity Solar is developing this technology with a world class consortium which includes: University of Waterloo Centre for Advanced PV Devices and Systems, University of Toronto, McMaster University, Fraunhofer Centre for Silicon Photovoltaics CSP, ECN Solar Energy Silicon Photovoltaics, Core Business Developers LLC and other partners. USI has recently signed five MOUs with potential customers for this advanced silicon PV materials. In June 2014, Sustainable Development Technology Canada (SDTC) announced funding to this project.

“As Ubiquity Solar’s preferred service provider, SNC-Lavalin (TSX: SNC) is pleased to be a partner of this important project in Sarnia, Lambton,” said Alastair Perry, General Manager, Sarnia, Ontario, SNC-Lavalin. With over 25 years of experience in the local market, SNC-Lavalin is in a unique position to leverage its capabilities to support the project development of Ubiquity Solar’s pilot and commercial scale facilities. “SNC-Lavalin will be providing front end engineering design, detailed engineering, procurement of agreed-to equipment and bulks, construction management, construction and commissioning services.”

George Mallay, General Manager of the Sarnia Lambton Economic Partnership stated, “Ubiquity's new pilot plant represents a significant Canadian innovation and diversification opportunity for Sarnia-Lambton's energy cluster and the development of Canada's solar industry,”

About Ubiquity Solar

Ubiquity Solar Inc. is a private company led by a team of industry veterans focused on providing the highest performance silicon bricks (Ubiquity SolarBricks™) and related products, technology and services to improve PV cell solar energy conversion efficiency.
